Welcome to our world of grass-fed lamb

GRASS-FED LAMB, A HEALTHY AND TASTY CHOICE, NATURALLY

FN Global Meat imports a complete assortment fresh and frozen prime quality grass-fed lamb from New Zealand and mutton from New Zealand and Australia.

NEW ZEALAND LAMB

Sheep were introduced into New Zealand between 1773 and 1777 thanks to the British explorer James Cook. Since that time New Zealand has become one of the leading exporters of lamb around the world.

In New Zealand, lamb is raised completely naturally. The flocks graze on open meadows, enjoying a diet of lush pasture, they are free range grown and free from all additives. The high rainfall, rich soils and gentle climate with mild winters and long warm summers allow animals to live outdoors all year-round. Food supplements common elsewhere in the world are unnecessary in New Zealand as grass is always available.

QUALITY & SERVICE

FN Global Meat imports fresh and frozen lamb and mutton the whole year round.

We continuously monitor the quality of all incoming goods. We keep stock for our customers, provide custom labelling in different languages and with barcodes and deliver exactly on demand. Service makes a difference!

Grass-fed lamb

A HEALTHY AND TASTY CHOICE, NATURALLY
